EDUCATION

K.K COLLEGE OF ENGG & MGMT.

B.Tech
Computer Science and Engineering
(2014-2018)

SAINIK SCHOOL GOPALGANJ

INTERMEDIATE, MATRICULATION
(2006-2013)

SKILLS

- HTML, CSS
- JavaScript
- React
- Redux
- Express
- VueJS
- NextJs
- NuxtJs
- MongoDB
- NodeJS
- ROR
- Git
- S3 & Cloudfront
- Jenkins
- REST Api Development

CERTIFICATIONS

- ALTCAMPUS
  (Fullstack development course)

SUMMARY

Frontend Lead with 6 years of experience, passionate about building scalable web applications, enhancing user experiences, and leading teams to drive innovation.

WORK EXPERIENCE

Engineering Lead - Vegrow - Bangalore
Aug 2024 - Present

- Lead and mentor a team of engineers to build scalable and high-performance multiple applications in organisation.
- Oversee code quality, best practices, and engineering processes for efficiency by keeping track of KPIs.
- Guide the team in adopting modern technologies(AI) and innovative solutions.
- Optimized frontend/backend performance, reducing load times by a significant difference.
- Mentored and upskilled engineers in 1:1, fostering a high-performance culture.

Team Lead | Frontend Lead - Vegrow - Bangalore
May 2021 - July 2024

- Led a team of 10+ engineers, driving the development of scalable and high-performance web applications by enforced coding standards, best practices, and optimisation strategies.
- Streamlined team workflows by managing the JIRA board, ensuring efficient backlog management and boosting team productivity.
- Developed and implemented an internal frontend library, standardising UI components and improving development speed across multiple projects.
- Designed and managed the entire frontend Jenkins CI/CD pipeline, automating build and deployment workflows for seamless releases.
- Managed S3 and CloudFront configurations, optimising asset delivery and improving website performance.
- Worked on multiple project deployment setups for Android and iOS app stores, streamlining the release process.

Staff Software Engineer - Drishti (Acq. by Apple) - Bangalore
Feb 2019 - Apr 2021

- Collaborated closely with cross-functional teams to transform business requirements into technical solutions.
- Successfully built an end-to-end analytics platform, enabling real-time data tracking and insights extracted from live video.
- Integrated live video streaming for critical operations, improving monitoring and decision-making.
- Developed a highly responsive WebSocket-based architecture, reducing latency and enhancing real-time updates.
- Leveraged interactive maps and charts, providing intuitive and data-rich visualisations for better insights.
